

SEARCH CONTENT PROGRAM

The screenshot shows the Embedded Developer website's search interface. At the top, there are navigation menus for Processors, Development Tools, Wireless, Video Library, Blogs, and Logicheads. Below these are Manufacturer, Distributors, Architecture, Newsletters, eMagazines, and Resources. A search bar is present with a 'Home > Search' link. The main content area displays a search for 'C2000 32-bit Real-time control MCUs >> F28M36H33B2' by Texas Instruments. The results are categorized into Description, Documents, Video, Tools, and Buy/Quote. The 'Description' tab is active, showing a list of features for the C2000 series, including ARM Cortex-M3, up to 1MB of Flash, up to 128KB of RAM, and various communication interfaces like UARTs, SPI, and CANs. A table on the left lists various part numbers and their families.

PROFILE PAGE

- Company Message, Logo, Link to your web site
- Product families with links to product groups and products (processors and development tools)
- Processor and development tool landing pages with links to all relevant reference material (user manuals, datasheets, videos, etc.)
- Link all products to available distributors for purchasing online

SEARCH INTERFACE

Engineers use the search interface to select processors, microcontrollers and development tools. Unlike other search interfaces engineers do not have to know what it is they are looking for, they search by requirement.
